PROFILE

Web developer with previous working experience in computer networks and infrastructures, and systems administration. I enjoy the challenge of creating complex applications and experiences that are interactive, informative and accessible. I strive to learn and improve my skills on the latest web technologies, and challenge myself every day to become a more knowledgeable and effective developer.

SKILLS

HTML	React	Express	Gatsby	Version Control
CSS	JQuery	Node.js	Contentful	Netlify
SASS	Firebase	MongoDB	GraphQL	DNS
Javascript (ES6)	RESTful APIs	Responsive Design	Accessibility	Networking

EDUCATION

Front End Web Development Immersive Bootcamp
Juno College of Technology | July - August 2020

Computer Systems Technician - Networking
Georgian College | 2008 - 2011

Intro to Web Development
Juno College of Technology | January -March 2020

PROJECTS

Podcast Prioritizer   LIVE | REPO

React | Firebase | Authentication | Rest API

Multiple calls to two APIs pulls data and calculates optimal mode of transport for listening to podcasts the user searches for. Utilizes Google Authentication and Firebase to store lists of podcasts specific to each user.

STOCKS APP   LIVE | REPO

React | Javascript | ChartJS

Buy and sell stocks on a fake stock market. Prices dynamically update as real-time passes and the speed of time can be changed. Graphs created with ChartJS to show performance of the portfolio and stock prices.

EXPERIENCE

Web Developer
Project CFTO | 2021 - Current

- Sole developer on a cross-functional team creating a website for a mutual-aid organization called Community Fridges Toronto
- Consult with stakeholders and team on design and technical considerations
- Tech stack includes Gatsby, Contentful, Netlify, Google Maps and Geocoding APIs

Senior Technical Support Specialist
Servicad Inc. | 2016 - 2020

- Led weekly meetings with other technicians to provide guidance on their tickets to ensure deadlines and client expectations were met.
- Planned and migrated multiple clients to the Office 365 platform to improve collaboration and reduce costs by eliminating end-of-life hardware.
- Translate business requirements into technical solutions, create documentation and training manuals and educate clients on how to effectively utilize software services and products
